

Why Volunteer?

What does it mean to be a volunteer Firefighter or Emergency Medical Services (EMS) provider?

For some, it is a way to give back to their communities. For others, it is a way to move onto a full time paid position in the fire or EMS field. Others see it as a way to make new friends and interact with a group of individuals who are motivated to come together to help one another. It is responding to any number of emergencies. It can be the challenge of learning how to cut a car apart, gain access to a burning home, or comfort a family member during their time of grief.

It is something you will never regret doing!

What you will Learn

You will be trained in CPR, Hazardous Materials, medical first response, and many other skills you will need along the path to your new career as an emergency responder. You'll have the opportunity if you chose to learn other valuable skills; grant writing, clerical office assistant, chaplain services, large equipment mechanics or prepare meals for large groups. Whatever your interest there are any number of ways to support your fire districts.

Answer the Call

Volunteer Today

**Firefighter, Emergency Medical Services,
Technical Rescue, Support Services**

Every day dedicated volunteers "Answer the Call" as firefighters, emergency medical responders, water rescue, rope rescue and support service personnel. Imagine if nobody answered the call. Neighborhoods would be left in ashes, medical assistance would arrive too late, and lives would be lost to our surrounding rivers, lakes and ocean.

Benefits of Volunteering

- Tuition assistance
- 24 on & off duty life insurance
- Reimbursement for attending national training programs
- Retirement programs
- Meeting other members of your community
